The European Chemicals Agency (ECHA) has updated the candidate list of „substances of very high concern“ (SVHC). The candidate list will be constantly expanded and updated. According to Art. 33 of the REACH Regulation manufacturers and suppliers of articles must inform their customers if a substance of the current candidate list is contained in the product in a concentration exceeding 0.1 percent by mass.

The last update of the list was on January, 17th 2022. The current list includes 223 substances (<http://echa.europa.eu/web/guest/candidate-list-table>).

Based on the information provided by our suppliers we can assure that our products do not contain any substance of the current candidate list in a concentration greater than 0.1 percent by mass.

Vöhringen, den 19.01.2022
