

**Clean and safe  
lubrication**

## GREASE GUN ELKALUB MCP 100

**One handed grease gun for clean  
and unmistakable lubrication with  
ELKALUB 100 ml screw cartridges.**

- › simple exchange of grease cartridges – no transfer/filling
- › easy to handle, clean and economical
- › small dispensing volume (0,35 ccm) prevents overlubrication
- › a wide range of different ELKALUB greases available
- › Grease type currently in use clearly visible to avoid confusion
- › Compatibility of grease gun and cartridges with existing systems

**Scope of supply:** grease gun, adapter for 1/8" equipment

**Accessories:** armored hose with hydraulic mouthpiece, nozzle tube with pointed mouthpiece

### ELKALUB greases available in the 100 ml cartridge:

| Products*          | NSF H1** | Application   |
|--------------------|----------|---|
| ELKALUB GLS 135/N2 |          | Universal grease for rolling bearings (esp. offset printing machines) as well as for linear guides and ball screws                                  |
| ELKALUB GLS 163    |          | Special grease with a distinct thixotropy for rolling bearings in printing machines   |
| ELKALUB GLS 361/N1 | ✓        | Mounting grease, especially to avoid tribocorrosion or fretting corrosion, prevent thread galling of stainless steel screw connections              |
| ELKALUB GLS 964/N2 | ✓        | Special grease with distinct adhesion and thixotropy (esp. for cam followers in printing machines and fast running packaging and bottling machines) |
| ELKALUB VP 874     | ✓        | Special grease with good wear protection and backflow behaviour for fast and alternating movements (e.g. linear guides, ball screws)                |
| ELKALUB VP 886     | ✓        | Polyglycol-based grease for special applications (e.g. rolling bearings in environments with high UV radiation and heat)                            |

\* Other greases available on request

\*\* NSF H1-registered lubricants are suitable for use in the food industry
